PROFESSIONAL SUMMARY

Results-driven **Business Transformation & Logistics Analytics Consultant** with 7+ years of experience leading operational transformation, process re-engineering, and analytics architecture across high-volume supply chain and freight logistics networks. Proven track record of converting complex warehouse, fleet, and financial workflows into automated KPI/KRI governance frameworks, scalable BI solutions, and executive decision-support models. Adept at driving cross-functional alignment, eliminating manual bottlenecks, and uncovering margin leakages to deliver measurable operational uplift and cost takeout.

CORE COMPETENCIES

Transformation & Operations: Business Process Re-engineering (BPR), Logistics & Warehouse Operations, Operating Model Modernization, Root Cause Analysis (RCA), Change Management, Cross-Functional Leadership.

Analytics & Architecture: KPI/KRI Framework Design, Advanced SQL (CTEs, Window Functions, Data Modeling), Data Extraction (Amazon S3), Automated Reporting Pipelines, Data Quality & Reconciliation.

BI & Decision Systems: Power BI (DAX, Star Schema Modeling), Tableau, Executive Scorecards, Margin & Utilization Tracking, Real-Time Visibility Dashboards.

Automation & Program Delivery: Power Automate, Agile Workflow Delivery, Zoho Projects, ClickUp, P&L & Cost Variance Modeling, Compliance & Controls Governance.

PROFESSIONAL EXPERIENCE

SRP US Logistics **Aug 2022 – Present**

Assistant Manager – MIS & Data Analytics

- **Enterprise Framework Build:** Architected the logistics analytics and performance governance framework from scratch, defining cross-functional KPI/KRI hierarchies and validation checks across operations, finance, compliance, and asset utilization.
- **Workflow Modernization & Automation:** Engineered end-to-end reporting automation leveraging SQL pipelines and Power Automate, eliminating repetitive reporting cycles and improving delivery timelines across workstreams by 35%.
- **Direct Cost Optimization:** Designed an in-house operational compliance and controls tracking platform, directly eliminating dependency on third-party vendors and realizing $150K in recurring annual cost savings.
- **Executive Strategy & QBRs:** Built and maintained executive Power BI performance suites; partnered directly with VP/C-suite leadership during weekly reviews and QBRs to translate operational trends into strategic decisions.
- **Root Cause Problem Solving:** Executed SQL-driven deep-dive reconciliation on Amazon S3 data lakes to isolate drivers behind cost spikes and turnaround delays, collaborating with operational unit heads to implement systemic fixes.
- **Commercial Enablement:** Formulated predictive financial variance and lane utilization models to provide critical decision support for leadership during client contract renewals and bids.

Cargaison Logistics **Jul 2019 – Aug 2022**

Executive – MIS & Data Analytics

- **Asset & Fleet Optimization:** Developed operational monitoring dashboards across a 500+ truck fleet, optimizing routing and idle-time trends to deliver an 18% reduction in equipment downtime.
- **Profitability & Lane Analytics:** Designed dynamic P&L and customer-by-lane margin reporting models with integrated quality controls, empowering leadership to optimize mix and increase gross margins by 9%.
- **Working Capital Improvement:** Built billing-vs-payments and accounts receivable reconciliation dashboards, identifying collection bottlenecks and cutting DSO cycles by 10 days.

- **Risk & Compliance Controls:** Established proactive compliance tracking mechanisms across multi-state transit jurisdictions, eliminating late filing penalties and reducing fine exposure by 25%.

KEY TRANSFORMATION ACHIEVEMENTS

- **Operating Model Turnaround:** Replaced fragmented, ad-hoc spreadsheets with unified data models, driving an enterprise-wide shift toward KPI/KRI-based operational governance.
- **FP&A Variance Reduction:** Integrated operational volume metrics with financial reporting lines, reducing budget-to-actual forecasting variance by 40%.
- **Direct P&L Impact:** Secured $150K in vendor cost takeout while simultaneously improving fleet utilization and billing cycle speed.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science **2016 – 2020**

Chandigarh Engineering College, Landran, Punjab
